ABOUT US

# Why Northbrook Analytical

Northbrook ANALYTICAL

For more than 25 years Northbrook Analytical has helped UK food producers, contract laboratories, universities and public analysts get reliable results from their laboratory instruments. We are not just a reseller: our own factory-trained engineers install, validate, calibrate and repair every instrument we supply, so you deal with one partner for the whole life of the equipment.

| 25+ | 1,800 | 48 h | ISO 17025 |
|---|---|---|---|
| years supporting UK labs | instruments under service | typical engineer response | traceable calibration |

- **One partner, whole lifecycle**
  Application advice, supply, installation & commissioning, IQ/OQ documentation, operator training, calibration and repair - all from one team.
- **Application expertise**
  Protein (Kjeldahl & Dumas), fat extraction, fibre, moisture and sample preparation for dairy, meat, cereals, beverages and contract testing.
- **Engineers across the UK**
  Field engineers based in the South East, Midlands, North and Scotland keep travel time short and first-time-fix rates high.
- **Accredited calibration**
  Calibration certificates traceable to national standards, aligned with ISO/IEC 17025 and your UKAS audit requirements.
- **Spares held in Milton Keynes**
  Over 1,200 spare-part lines held in stock for next-day dispatch, with serial-number traceability on every instrument we deliver.
- **Transparent service plans**
  Silver and Gold service contracts with guaranteed response times, included preventive maintenance and discounted parts.

## Industries we serve

Dairy · Meat & fish · Cereals & bakery · Beverages & brewing · Contract laboratories · Universities & research · Public analysts · Animal feed

> *Northbrook installed and validated our new Kjeldahl line in two days and trained the whole shift. Two years on, calibration visits are booked before we even ask.*
>
> **QA Laboratory Manager, UK dairy co-operative**
